

# Clinical Indications for Veterinary MRI

## BRAIN

### Congenital Abnormalities

- ◆ Cerebellar Hypoplasia
- ◆ Cerebellar Abiotrophy
- ◆ Hydrocephalus
- ◆ Caudal Occipital Malformation

### Inflammatory Disease

- ◆ GME
- ◆ Leukoencephalopathy

### Infarction

### Primary Neoplasia

### Pituitary Disease

- ◆ Macroadenoma

### Trauma

### Seizure

## NECK

### Neck Mass

### Retropharyngeal Mass

### Thyroid Mass

## HEAD

### Nasal Disease

- ◆ Neoplasia
- ◆ Aspergillosis
- ◆ Non-Fungal Rhinitis

### Ear Disease

- ◆ Otitis Media/Interna/Externa
- ◆ Bulla Osteitis
- ◆ Neoplasia

### Oropharynx & Nasopharynx

- ◆ Polyp

### Salivary Gland Mass

- ◆ Mucocele/Sialocele
- ◆ Neoplasia

### Orbits

- ◆ Retrobulbar Abscess or Mass
- ◆ Optic Nerve

## SPINE

### Congenital Abnormalities

- ◆ Syringohydromyelia
- ◆ A – A Subluxation

### Intervertebral Disc Disease

### Fibrocartilagenous Embolism

### Spinal Cord Contusion

### Discospondylitis

### Inflammatory Disease

- ◆ Myelitis

### Primary or Metastatic

### Neoplasia of the Spinal Cord

### Paraspinal/Vertebral

### Neoplasia

- ◆ Nerve Sheath Tumor
- ◆ Osteosarcoma
- ◆ Fibrosarcoma
- ◆ Metastasis

### Peripheral Nerve Disease

- ◆ Neuritis
- ◆ Nerve Sheath Tumor

## MUSCULOSKELETAL

### Achilles Tendon Tear

### Synovial Cyst

### Patellar Tendon Tear

### Osteochondritis Dissecans

### Meniscal Tear

### Mass/Metastatic Lesion

### Mass/Soft Tissue

### Ligament Tear

### Intra-articular Loose Bodies

### Cruciate Ligament Tear

### Collateral Ligament Tear

### Capsule Tear

### Soft Tissue Cyst

### Avascular Necrosis
